

pointillism:
a painting
style using
tiny dots of
colour

neo-
impressionism:
an art movement
that used science
and colour
theory

colour theory:
how colours
work together
to create
different effects

impressionism:
an art style
that captured
light and
everyday life.

Year 3/4: Georges Seurat (1859 - 1891)

He helped
start a new
art movement
called neo-
impressionism.

His paintings
are made up
of tiny dots.

small-scale:
something
that is limited
in scope or
size

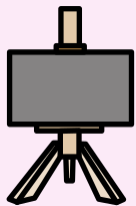

contrast:
the difference
between light
and dark
colours

He was born
in Paris,
France.

He believed
science could
help artists
choose colours.

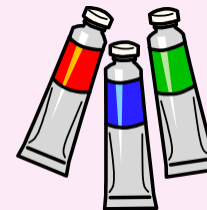

canvas

charcoal

brushes

oil paints

He made lots of
practice
sketches before
starting a final
painting.

His paintings often
show people relaxing
in parks, by rivers or
at the seaside.
